

CALIBRATION CYLINDER

The Endee Cylinder Gas Calibration Kit may be used for calibrating cup for quick and accurate calibration.

TECHNICAL DATA

Water Capacity	: 0.5 Ltr
Fill Pressure/Burst Pressure	: 21 bar/55 bar
Quantity of Gas available for use	: 10 Ltr and 20 Ltr
Container wall material	: Aluminium.
Weight when full	: Less than 300 gms.

APPLICATION

- Check Toxic Gas Detectors.
- Check Combustion Efficiency Monitor.
- Environmental Tests.

SPECIAL FEATURES

- The user has 10 litres of usable gas.
- The cans are light weight and can easily be carried into difficult locations to check the instruments.
- No wastage of gas as the gas is drawn by a re-usable "take-off valve with flow indicator".
- The mixtures are high accuracy and each batch is checked prior to despatch.
- Special mixtures to customer specification can be supplied subject to a minimum quantity of Mini Spancans per mixture. Many mixtures available ex-stock.
- Express shipment by courier to most areas of India.
- Disposal, non-returnable containers reduce overhead costs.

Endee Engineers reserves the rights to specification changes which may occur with advances in design without prior notice.
